***Allowable Subject Matter***

1. Claims 1-3 and 5-6 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior arts, Roeck (US 6,594,303 B1) teaches a cable modem termination system (CMTS) configured to perform initial and periodic ranging with a network of cable modems; Leano et al. (US 6,453,472 B1) teaches a method apparatus for performing periodic ranging with a cable modem. It is determined whether an actual power level of the cable modem requires adjustment to a desired power level and it is indicated to the cable modem that it should adjust the actual power level to an adjusted power level that differs from the actual power level of the cable modem by less than or equal to a first dynamic range associated with the cable modem. Roeck and Leano fail to teach or fairly suggest the feature of dividing a dynamic range of the network client device into a plurality of regions by dividing the dynamic range of a transmitter of the network client device by the dynamic range of a receiver of the network device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
